

AI Usage Declaration
CSE391 – Programming for the Internet
Assignment 1: Personal Portfolio Website

I declare that this portfolio website is my own academic work. During the development of this assignment, I used ChatGPT as a learning and support tool. The AI assistance was limited to explaining HTML and CSS concepts, suggesting improvements to webpage structure, helping identify coding mistakes, recommending design ideas, and assisting in preparing the project documentation and this declaration. I personally wrote, modified, tested, debugged, and organized the HTML and CSS files before submission.

I reviewed all AI suggestions and only incorporated ideas that I understood and could explain. I confirm that I take full responsibility for the final submitted work and that it complies with the academic integrity expectations of CSE391.
